

Job Title: Engineer II – SCADA Practice

Location: Horsham, PA, Indianapolis, IN, Lowell, MA, or Houston, TX. Remote will be considered.

Company Name: Q-mation, LLC

Job Overview:

Q-mation is an AVEVA™ Select software distributor headquartered in Horsham, PA. We also have offices in Lowell, MA, Indianapolis, IN, and Houston, TX. We provide software application development and consulting services for industrial customers all over the world. We have an open work environment where knowledge-sharing and team discussions are encouraged. Our success is determined by the quality of work each engineer produces for each customer on every job.

To meet the rising demand for consulting services, we're seeking experienced SCADA Engineer candidates for our HMI/SCADA practice who are ready to face the challenges presented by our manufacturing customers and their complex automation & information technology environments.

Job Duties:

- Design, develop, test, and deliver robust automation and HMI/SCADA solutions
- Provide onsite and remote installation, training, and commissioning support for delivered solutions
- Provide consulting, troubleshooting, and support for AVEVA software such as InTouch, System Platform, etc.
- Upgrade existing production software applications, with or without modifications
- Contribute to consulting operations activities such as recruiting, new product research, etc.
- Contribute to continuous improvement of software development best practices
- Install, configure, and troubleshoot Microsoft and other 3rd party software such as: VMWare, MS Windows, MS SQL Server, MS RDS, etc.
- Understanding of how to look up and research information on troubleshooting methodology and steps to resolve
- Execute small and medium projects independently with little oversight to no oversight
- Independently collaborate with customers
- Consistently execute a project's internal and external kick-off meeting
- Able to keep meeting minutes for ongoing projects
- Able to prioritize billable work over non-billable work
- Able to manage project hours and ensure the scope is completed for a project
- Able to provide guidance/mentorship for Engineer I and Interns

Personal Attributes:

- Self-motivated; Driven to be productive; Effective multi-tasking ability
- Strong customer service and teamwork mindset
- Effective interpersonal listening and responding skills
- Effective speaking, writing, and presentation skills
- Detail oriented; Diligence in preparation, Excellence in deliverables
- Ability to manage your own tasks/self sufficient
- Starting to develop service mentality
- Loves to learn

Job Requirements:

- A Bachelor's degree in a technical field from a 4-year college or university is preferred
- 3+ years in the automation industry is preferred
- Proficient in any of the following: Microsoft Office, SQL Server, and an object-oriented programming language
- Proficient in any of the following: AVEVA System Platform, InTouch, Edge, MES, PI, Plant SCADA, Insight, Historian
- Nice to have: SCADA Experience, VM experience, terminal services
